

# SAGA

## CARD GUIDE

# -Intro to the Cards-

Every card in SAGA represents either a troop or a spell. Isolated troop cards can be amassed into 'units.' This guide explains the difference between the units in detail. The statistics presented here are for Level 1 units, and are current as of the build at the top of this page. **If you find any differences between what's listed here and what's listed inside the game, please detail the differences and send them to [dmeyer@playsaga.com](mailto:dmeyer@playsaga.com).**

Each troop's card will be presented with information similar to this:

COMMON		"Human Archers"						
Infantry Ranged	CP	1	DMG	5 - 15	Morale	45		
	AR	18	Range	65	S/A	1		
	DR	16	Stamina	75	Att/S	0.5		
	HP	250	Speed	6	Res	10		
	"(passive) Human Archers have a +75% AR and +100% damage against flying units."							
								
Bow	Leather							

**Rarity** - All cards have a 'rarity', that is to say, how frequently you will come across them in booster packs (common, uncommon and rare).

**Class(es)** - Troops can have various classes: Infantry, Ranged, Mounted, Siege and Flying. Some troops have bonuses against certain classes. The Human Archers, for example, gain a bonus when fighting flying units.

**Equipment** - These icons tell you what kinds of items a troop can use.

**CP - Command Points:** How many CP are used per troop. A unit may only have up to 30 CP total, and creating the unit itself costs 5 CP. If a troop has 1 CP, you will be able to fit 25 of them in a single unit.

**AR - Attack Rating:** Determines the likelihood of each attack the troop makes successfully hitting its target.

**DR - Defense Rating:** Determines the likelihood of a troop successfully defending against an attack. In battle, you will see DR(m) and DR(r) for defense against Melee and Ranged attacks, respectively.

**HP - Hit Points:** The amount of life a troop has. More HP means a troop can take more damage before either being wounded or dying.

**DMG - Damage:** The range of damage in hit points that a successful attack will inflict.

**Range:** The maximum distance at which a ranged unit is able to attack in game meters.

**Stamina:** Determines how long a troop can run or fight without slowing.

**Speed:** Determines the speed at which the troop moves.

**Morale:** Determines the likelihood of a troop fleeing battle, beyond a commander's control (See Morale).

**S/A - Strikes per Attack:** Number of targets potentially affected by each attack the troop makes.

**Att/S - Attacks per Second:** Describes the frequency of attack for the troop.

**Res - Resurrection cost:** The amount of god favor you would spend to resurrect the unit from your graveyard when it is dead.

**Special** - Each unit also possesses its own special abilities. Some units have passive abilities, which always influence their stats in battle. Otherwise, units' abilities take effect only when activated in battle.

Each spell's card will be presented with information similar to this:

	Rank	CP	"Die"	Rare	GF Cost: 30	Warm	Cool
	1	20	"Targeted unfriendly enemy unit suffers 200-400 points of damage."			90	120
	2	25	"Targeted unfriendly enemy unit suffers 220-450 points of damage."			90	110
	3	30	"Enemy units in target radius (15m) suffer 200-400 points of damage."			75	120
	-	-				-	-
	-	-				-	-
	-	-				-	-

**Rank:** For each copy of the card you have, you can stack them into a higher ranked spell.

**CP:** The amount of CP the spell costs to deploy at each specific rank.

**Effect:** The effect of the spell at each specific rank.

**GF Cost:** The amount of God Favor it costs each time the spell is used.

**Warm:** The amount of time you must wait between deploying the spell and casting it.

**Cool:** The amount of time you must wait after casting the spell to cast it again.

# Neutral Cards

"Armored Behemoth"						Uncommon	
CP	15	DMG	20 - 70	Morale	80	Mounted	
AR	20	Range	3	S/A	4
